Reset Get Cart Open Plugin

The resetGetCartOpen plug-in looks for an instance of the purchase event and then allows the scOpen event to be set again if a new shopping cart is created. This should be used with the Get Cart Open plugin.

Plugin Prototype

```
s.resetGetCartOpen();
```

Example

The plugin is used with the s.events call.

```
s.events=s.resetGetCartOpen();
```

Code

```
/*  
 * Plugin: resetGetCartOpen  
 */  
s.resetGetCartOpen=new Function("" + "var s=this,t=new  
Date,e=s.events?s.events:'';t.setTime(t.getTime()+  
"10000);if(e.indexOf('purchase')>-1){if(s.c_r('s_scOpen')||e.indexOf"  
+'('scOpen')>-1){if(!s.c_w('s_scOpen','',t)){s.c_w('s_scOpen','',0);}"  
+"}}return e");
```
